

Midcoast Internet Coalition
Guiding Principles

- Establish regional utility district through interlocal agreement as permitted by State law
- Build a Fiber to the Premises (FTTP) internet network to provide cheaper, faster and better high-speed internet access
- Ensure that the network is open access, inviting multiple providers to deliver services to residents and businesses which will offer a range of products, pricing options and competition
- Establish a minimum symmetrical speed of 100 Mbps for download / upload to be provided by any service provider leasing the utility's dark fiber network with the capability of providing symmetrical 1 Gig for users choosing that option
- Provide universal access to all residences and businesses within the geographic region of the utility
- Best in class customer support with locally managed and operated offices
